

Course Number and Title: DHY 205 Clinical Dental Hygiene V

Campus Location:

Dover, Wilmington

Effective Date:

2018-51

Prerequisite:

DHY 204

Co-Requisites:

none

Course Credits and Hours:

4.00 credits

1.00 lecture hours/week

16.00 lab hours/week

Course Description:

This final clinical experience course incorporates all previous and current knowledge and techniques learned in related dental hygiene courses into treatment for a full spectrum of patients. The course seminar emphasizes problem-solving and sharing of clinical experiences.

Required Text(s):

Obtain current textbook information by viewing the [campus bookstore - https://www.dtcc.edu/bookstores](https://www.dtcc.edu/bookstores) online or visit a campus bookstore. Check your course schedule for the course number and section.

Additional Materials:

Dental Hygiene First and Second Year Student Kit

Dental Hygiene Program Policy and Procedures Manual

Allied Health/Science Department Program Student Policy Manual

Schedule Type:

Classroom Course

Disclaimer:

None

Core Course Performance Objectives (CCPOs):

1. Demonstrate professional behavior consistent with the values of the dental hygiene profession. (CCC 1, 2, 3, 4, 5, 6; PGC 2, 3, 6)
2. Promote a safe working environment to protect the dental health team and the patient. (CCC 1, 2, 3, 4, 5, 6; PGC 3, 6)
3. Evaluate and apply the principles of data collection and patient assessment in patient care delivery. (CCC 1, 2, 3, 4, 5, 6; PGC 1, 3, 4, 5, 6)
4. Demonstrate the principles of instrumentation in patient care delivery. (CCC 1, 2, 3, 4, 5, 7; PGC 1, 3, 4)
5. Conduct comprehensive dental hygiene treatment for patients from a full spectrum of patient populations exhibiting various states of oral health. (CCC 1, 2, 3, 4, 5, 6; PGC 1, 2, 3, 4, 6)

See Core Curriculum Competencies and Program Graduate Competencies at the end of the syllabus. CCPOs are linked to every competency they develop.

Measurable Performance Objectives (MPOs):

Upon completion of this course, the student will:

1. Demonstrate professional behavior consistent with the values of the dental hygiene profession.
 1. Write a self-evaluation of clinical experiences weekly.
 2. Discuss clinical experiences in a seminar format.
 3. Demonstrate effective oral, non-verbal, and written communication in the clinical setting with patients and members of the dental team.
 4. Demonstrate professional behavior patterns that meet employer expectations and professional association guidelines including but not limited to attending, arriving on time and staying until the conclusion of the educational experience, dressing appropriately, preparing adequately, and displaying appropriate interpersonal dynamics and communication skills.
 5. Demonstrate appropriate patient management skills.
 6. Demonstrate a commitment to completing dental hygiene treatment for all patients and continuing their care throughout the clinical course.
2. Promote a safe working environment to protect the dental health team and the patient.
 1. Apply appropriate infection control protocol during all dental hygiene procedures.
 2. Demonstrate the proper operation and maintenance of dental equipment.

3. Demonstrate the principles of patient, operator, and light positioning during dental hygiene procedures.
4. Demonstrate proof of current cardiopulmonary resuscitation (CPR) certification.
5. Apply principles of radiation safety.
3. Evaluate and apply the principles of data collection and patient assessment in patient care delivery.
 1. Construct comprehensive medical history documents based on appropriate follow-up questions and medical references.
 2. Recognize contraindications to and/or the need for modifications to dental hygiene care.
 3. Demonstrate the techniques to determine and record the vital signs of a patient.
 4. Use techniques to perform an extraoral and an intraoral examination.
 5. Document clinical findings using appropriate descriptive terminology.
 6. Classify the care level of a patient based on assessment data.
 7. Develop a dental hygiene treatment plan based on patient needs.
 8. Evaluate a patient's periodontal health using the periodontal probe and other diagnostic aids.
 9. Chart periodontal findings on an initial and final periodontal record.
 10. Chart subgingival calculus per discretion of the clinical instructor(s).
 11. Chart caries/ restorative findings using appropriate diagnostic aids.
 12. Assess a patient's oral hygiene through completion of a patient hygiene performance (PHP) index.
 13. Evaluate the patient's general and oral health status at subsequent appointments using the appropriate diagnostic aids.
 14. Prepare all patient records and clinical forms promptly, accurately, and legibly.
 15. Produce diagnostically acceptable radiographs/images including periapicals, bitewings, and full mouth series, as determined by patient need.
 16. Assess dental radiographs/images in terms of diagnostic quality and findings.
 17. Use intraoral and/or extraoral camera equipment to obtain photographs of oral conditions.
4. Demonstrate the principles of instrumentation in patient care delivery.
 1. Identify all instruments in the student kit.
 2. Demonstrate the use of examination instruments to assess oral health.
 3. Demonstrate effective removal of dental deposits and stains.
 4. Demonstrate effective periodontal debridement on patients in the clinical care level (CL) Class II, Class IIP, and Class III/IV.
 5. Demonstrate engine and air powder polishing techniques.
 6. Employ methods to assess sharpness and complete instrument sharpening effectively.
 7. Use the ultrasonic scaler (piezo/cavitron) as determined by patient need.
 8. Prepare the appropriate armamentarium for the delivery of local anesthesia by the dentist.
5. Conduct comprehensive dental hygiene treatment for patients from a full spectrum of patient populations exhibiting various states of oral health.
 1. Conduct dental hygiene treatment on patients from a full spectrum of populations including a minimum of one each: child, adolescent, adult, and geriatric.
 2. Demonstrate appropriate clinical management skills.
 3. Conduct dental hygiene treatment on patients with varying degrees of difficulty including clinical care level Class I, Class II, Class IIP and Class III or Class IV.
 4. Conduct all dental hygiene treatment planned for a minimum of four periodontally involved patients, two of which are clinical care level Class III or Class IV.
 5. Conduct education regarding oral physiotherapy and other preventive measures for various patient populations.
 6. Demonstrate the procedures for applying professional topical fluorides.
 7. Apply pit and fissure sealants.
 8. Demonstrate the techniques for taking alginate impressions and pouring working models.
 9. Demonstrate the procedures for fabricating mouthguards, fluoride, and/or bleaching trays.
 10. Demonstrate professional methods for desensitizing teeth.
 11. Use the appropriate antimicrobial agent for subgingival delivery.
 12. Demonstrate the techniques for application of topical anesthetics.
 13. Demonstrate the techniques for completing oral health counseling.
 14. Examine patients at continuing care visits to determine the success of previous procedures completed and patient behavior modification.
 15. Start and complete continuing care procedures for two patients scheduled during one clinic session as required in a private practice rotation.
 16. Conduct comprehensive dental hygiene treatment for patients to meet the clinical graduation requirements of the dental hygiene program.

Evaluation Criteria/Policies:

Students must demonstrate proficiency on all CCPOs at a minimal 75 percent level to successfully complete the course. The grade will be determined using the Delaware Tech grading system:

92	-	100	=	A
83	-	91	=	B
75	-	82	=	C
0	-	74	=	F

Students should refer to the [Student Handbook - https://www.dtcc.edu/handbook](https://www.dtcc.edu/handbook) for information on the Academic Standing Policy, the Academic Integrity Policy, Student Rights and Responsibilities, and other policies relevant to their academic progress.

Core Curriculum Competencies (CCCs are the competencies every graduate will develop):

1. Apply clear and effective communication skills.
2. Use critical thinking to solve problems.
3. Collaborate to achieve a common goal.
4. Demonstrate professional and ethical conduct.
5. Use information literacy for effective vocational and/or academic research.
6. Apply quantitative reasoning and/or scientific inquiry to solve practical problems.

Program Graduate Competencies (PGCs are the competencies every graduate will develop specific to his or her major):

1. Collect and analyze baseline data in a critical and scientific manner regarding the patient's health status to determine dental hygiene treatment needs.
2. Utilizing professional communication skills and behaviors, initiate and responsibly advocate health care promotion and disease prevention for diverse populations.
3. Provide dental hygiene care in a safe manner.
4. Utilizing self-assessment skills, evaluate clinical performance and the effectiveness of dental hygiene treatment.
5. Accurately document information related to dental hygiene care through proper record keeping.
6. Recognize and manage the professional and ethical issues of dental hygiene practice in a dynamic environment.

Disabilities Support Statement:

The College is committed to providing reasonable accommodations for students with disabilities. Students are encouraged to schedule an appointment with the campus Disabilities Support Counselor to request an accommodation needed due to a disability. A listing of campus Disabilities Support Counselors and contact information can be found at the [disabilities services - https://www.dtcc.edu/disabilitysupport](https://www.dtcc.edu/disabilitysupport) web page or visit the campus Advising Center.
